Alternative performance measures and comparability of information

This presentation includes non-IFRS performance measures, including Net Revenue, Net gaming revenue ("NGR"), Operating EBITDA, Adjusted EBITDA, Adjusted EBITDA margin and CAPEX, among others.

For Net Revenue, Net gaming revenue, Operating EBITDA, Adjusted EBITDA, Adjusted EBITDA margin and CAPEX and other similar non-IFRS measures, please refer to Allwyn AG's Preliminary Unaudited Financial Results dated around the same date as this presentation, which include definitions of these non-IFRS measures.

As there are no generally accepted accounting principles governing the calculation of non-IFRS financial and operating measures, other companies may calculate such measures differently or may use such measures for different purposes than we do, and therefore you should exercise caution in comparing these measures as reported by us to such measures or other similar measures as reported by other companies. These measures may not be indicative of our historical operating results or financial condition, nor are such measures meant to be predictive of our future results or financial condition. Even though the non-IFRS financial measures are used by management to assess our financial position, financial results and liquidity and these types of measures are commonly used by investors, they have important limitations as analytical tools, and you should not consider them in isolation or as substitutes for analysis of our financial position or results of operations as reported under IFRS.

Comparability of information

Allwyn AG was formed from the combination of Allwyn International AG and OPAP S.A. Unless otherwise stated, financial information in this presentation is presented on a look-through, non-IFRS basis to show the underlying performance of the enlarged Group. Such financial information is prepared as if Allwyn International AG had been the parent entity throughout both periods, adjusted for 100% ownership of the Greece and Cyprus entities (formerly, OPAP S.A.), but excludes the historical contribution from Allwyn International AG's German casinos, which were sold in 2025, in all periods presented to enhance comparability. PrizePicks financial information is consolidated from 16 January 2026, with the acquisition having a material impact on the consolidated metrics for Q1 2026 and on comparability with the prior period.

The reported consolidated statement of comprehensive income of Allwyn AG, prepared in accordance with IFRS, differs materially from the financial information presented on a look-through basis, as it reflects the financial results of the contributed entities only from 24 March 2026 onwards, while the comparative period solely comprises OPAP S.A.'s financial results, represented in Allwyn's reporting format.
